# Chapter 1

## OSLC-arch

OSLC is a collection of specifications for software integration. This module contains entities for [architecture management](#).

## Chapter 2

# Module Documentation

### 2.1 Entities

#### 2.1.0.1 `ogit/OSLC-arch/Resource`

A generic architecture resource. A resource of this type is likely to be a model or design artifact.

- id: <http://www.purl.org/ogit/OSLC-arch/Resource>
- valid-from: Thu Sep 22 00:00:00 UTC 2016
- creator: OGIT Importer
- scope: NTO
- parent: `ogit/Node`

#### 2.1.0.2 `ogit/OSLC-arch/LinkType`

A locally managed resource that describes a link type predicate that might otherwise not be directly resolvable.

- id: <http://www.purl.org/ogit/OSLC-arch/LinkType>
- valid-from: Thu Sep 22 00:00:00 UTC 2016
- creator: OGIT Importer
- scope: NTO
- parent: `ogit/Node`
